Here are some **home remedies for managing an abscess molar tooth**:

- **Saltwater Rinse**: Mix 1/2 teaspoon of salt with 1/2 cup of warm water. Rinse your mouth for 2 minutes and repeat up to three times daily to relieve pain and promote healing.
[2]
- **Baking Soda Rinse**: Combine 1/2 teaspoon of baking soda with 1/2 cup of water. Swish the mixture in your mouth for about 5 minutes, then spit it out. Repeat until finished.
[2]
- **Oregano Oil**: Dilute oregano oil with a carrier oil and apply it to the affected area. This oil has antibacterial properties that may help reduce pain and swelling.
[2]
- **Garlic**: Crush a garlic clove and apply the juice directly to the abscessed tooth. Garlic has antibacterial properties that can help fight the infection.
[1]
- **Cold Compress**: Apply a cold compress to the jaw to reduce swelling and discomfort.
[1]

These remedies can provide temporary relief, but it's important to consult a dentist for proper treatment if the abscess persists.

How to Get Rid of a Tooth Abscess Without Going to the Dentist

A **tooth abscessis** a collection of pus that forms when a tooth gets infected with bacteria. It usually happens when a person has a decayed or broken tooth. Bacteria from the mouth moves through the broken opening into the tooth’s pulp (the part that contains nerves and blood vessels), causing infection. There are … See more
